Note:		Software mailed / /	Initials _____
Date account active / /	Initials _____	Accounting entered / /	Initials _____

Dial-up Registration NOTES

1. In some cases, your 1st & 2nd choice requested e-mail / login name has already been taken. We will assign a reasonably close e-mail / login name for you to use.
2. Also, your password may already be in use, or might be unsuitable due to some character sequence issue...so, we will assign a secure password for you to use.
3. Dial-up accounts are intended for intermittent use. That is, dial in, do your business...maybe surf the Web a little and then log off. We are all sharing this resource. Refer to the *RTMX Networking* "Acceptable Use Policy" (accompanying this form) to review our requirements. You are bound by this policy when using *RTMX Networking* resources.
4. Your Credit Card information is secret. It will be protected as such. Do not give your Credit Card information to ANYONE claiming to be a representative of / or affiliated with *RTMX Networking*, LLC, who has called you from some other location. Instead, you may use our fax (775) 593-2503, call us directly at our office during business hours (919) 644-6456 or via the US Postal Service mail to provide this information.
5. *RTMX Networking* performs regular maintenance on our high-performance systems. We attempt to do these maintenance items during off-peak hours, between 11PM and 6AM where possible. On rare occasions we may be forced to perform service on a resource during peak hours. In such instances we make every attempt to not disrupt service by utilization of multiple (backup) servers.
6. *Most RTMX Networking* systems are fully standby power sustained, and can survive extended total power outages. Other systems are battery sustained and can survive power outages in excess of thirty-minutes duration. During such instances we will begin an automated and orderly shutdown of some resources, starting with the least critical through to the most critical. When grid power has returned and is stable for five minutes, we will reverse the process and restore services. Please be aware of this when attempting to re-connect after a wide area power disruption.
7. *RTMX Networking* dial-up accounts is are not, by default, assigned an e-mail mailbox. E-mail "boxes" can be purchased for an active account. See our Product Description page on the *RTMX Networking* Web Site at:
<http://www.rtmx.net>

If there are any questions regarding this Application Form, our Policies or Procedures - please call or write us.
